

WILD ONES After-School Eco Club

Exploring the world around us through science and fun.

SAVE THIS FLYER! The Prairie Ecology Bus Center is offering **FREE** after-school programs for Riverside students in grades 3-5. Each month has a different topic. Students sign-up by returning the permission slip at right to the school secretary.

Save the left half of this flyer as your reminder.
Don't miss these awesome activities! Questions?
Call PEBC at 507-662-5064.

Grossology

If you dare, join us and discover things you probably didn't really want to know—such as what happens in the moments before a skunk sprays and why slugs travel on highways of slime! Plus, what grossology course would be complete without getting the scoop on poop with a side of blood and maggots? By the time we're done grossing you out, we hope to change your "ewws" into "oohs" and "ahhs!"

DATE: November 14, 2017 3:15-5:00 p.m.

Engineering

Do you wonder how skyscrapers can be so tall and not fall over in earthquakes? Or what makes a bridge strong enough to hold up cars? Come use your problem solving, balancing, and building skills to answer these questions yourself in this building focused program. Let's see if your creations can survive the stress testing!

DATE: December 12, 2017 3:15-5:00 p.m.

Chain Reaction

Most inventions aim to make life easier, but Rube Goldberg loved to make a simple task, like turning on a light, much, much more difficult. We will make our own chain reaction machines to get small jobs done. Ping pong balls, springs, hammers, toy cars, or dominos. What will you use to create your machine?

DATE: January 16, 2018 3:15-5:00 p.m.

Art of the Animal

If you're a crafty critter you're in the right place! This program is jam-packed with wildlife inspired projects and activities. You will make origami folded paper beasts, plus a whole zoo of other fun crafts and games. Don't miss it!

DATE: February 20, 2018 3:15-5:00 p.m.

Micro-Journey

Right under your nose is a world you've never seen. But it's no match for the high-tech tools we have for you. Students will use microscopes to explore the invisible world through fun activities and experiments. What will you see? Only your imagination knows!

DATE: March 20, 2018 3:15-5:00 p.m.

Prairie Ecology Bus Center After School Programs Student Sign-Up Form

Fill out the information below to register your student for the

WILD ONES After School Eco Club

program series.
